Deserveth to be beaten with the Sconge

Of the Eclipses of the Luminaries which happen
this Year 1699

FOUR times will the Luminaries be Eclipsed this year,
twice the Sun, and as often the Moon, w^{ch} happens thus.

The first will be an Eclipse of the Moon on March 5, at 8
at night, 'twill be visible, & 10 parts of the \mathcal{D} body darkned.

The 2^d of the Sun March 21 about 5 in the morn. 'twill
be but a small Eclipse and scarce visible to us by reason of the
 \mathcal{D} s great Parallax.

The 3^d will be an Eclipse of the Moon August 30, near
noon, and therefore not seen by us, but by our Antipodes.

The last will be a great Eclipse of the Sun September 13,
about 11 in the morning; this will be a great and visible
Eclipse, and as great as has happen'd this forty years, for
there will be 10 digits of the Suns Body darkned--worth
Observation.

THE Spring Quarter Begins this year March the 10th,
about 6 in the morning.

The Summer Quarter Commences June the 11th, near
8 in the morning.

The Autumnal Quarter takes beginning September the 12
at 11^h 2' at night.

The Winter Quarter Begins December the 11th, at 11^h,
37' in the morning.

The 14 day of September will happen a famous Opposi-
tion of \mathcal{h} and \mathcal{S} , from Ω and ω .

Of the Suns Eclipse.

WHEN as the Sun his Light seems for to Lose,
The proper cause thereof we thus Disclose:
It is the Moons Grois body (wanting Light)
That (as a Window shut) hides from our sight
The Suns Bright Beams, and makes his face obscure,
So long as the Conjunction doth endure.
The Sun Eclipse to those by whom 'tis seen,
Doth not in Obscuration equal seem.
By some th' Defect's seen more, by others Less;
All that see it don't equall Light possess
Eclipses Ominous are, of strange events,
As publick Ruines mortal Discontents.
To Mankind, Beasts, and Cattel they prelage
Disasters and Diseases thence to Rage.
For every hour of Time this greater Light
Is passive and Deficient from our sight,
One year for the effects (thence to succeed)
Are Limited, as Modern Authors Read.

Of the Moons Eclipse.

WHEN as a Mask or Vizard seems to affright
Watch-tandle Luna, Governess of the Night,
The Dark and Gloomy Earth (this Massy-Ball)
Then Interpos'd (like a Partition Wall)
Between the Sun and her Declining Face
Occasions her Eclipical Disgrace.
To all that view this Light both far and near,
Th' Defect in equal measure doth appear.
The Moons Eclipses always signifie
Fire, Sicknes, War, or some Calamitie.
And look how many hours the Moon doth lack
Her Total light (which by the Earth's held back)
So many Months the Antients apprehend,
Th' effects to Last, and after that to end.

Culpepper 1699.

On the Seven Planets.

1 Saturn. ♄.

COld Natur'd Chronus, pondrous Moving Light,
Sly Falcifer, Dark-Lanthorn of the Night,
Rules o're Deep Vaults, and Darksome Den's below,
Where Noyseome herbs (with stragling scents) do grow.
Patron of Tillage, Greater Beasts, and Cattel,
Hard Labours, Drudgers, Lord of Land and Battel.
Author of Dearth and Famine, Long-Diseases;
Such things as these, this sullen Planet Pleases.

2 Jupiter. ♃.

Sweet Tempered Jove the Eye of Modest light
Resplendant in the Horizon of Night!
Soft-pacing Reed through Heavens Golden Path,
The Rule of Justice in his power hath.
He signifies the Peace and happy state
Of Common Wealths, and Men subordinate,
The Clergy, Church Affairs, the publick Good
And stays th' effusion (too) of Christian Blood.
The Grand effects Fomented by this Star,
Are Opposite to Dearth, Division, War.
See how the Summer Goddesses appear,
When Jupiter's made Ruler of the year.

3 Mars. ♂.

THE next Superiour Planet of the Seven,
Is Buike Mars that fiery spark of Heaven!
To whose command, and Patronage alot
Contentions, Wars, Jarrs, Plunders, and what not?
He signifies Disease-- that Quickly kills,
Engines of Warr, Fire-works, and Sun-burnt Hills;
Great Heat and Drought his Influence lets fall,
When o're the Year he Rules as Cardinal.

4 Sol. ☉.

MAjestic Sol that Full-ey'd Lamp of day
With Golden Locks, (each Lock a Burnish'd Ray
Of earth refreshing comfort) drives his Carr
Diurnally about this Terrene Star.

This Planet signifies the Regal Line
Of Noble-Blood, the Grand, and most sublime
Of Mortals Bearing Rule, Men of Renown
And such as sway the Scepter and the Crown,
Gold Pearl and precious Minerals (not few)
Presages of his Influence do shew;
The which (as cordial Antidotes) dethroy
Distempers, that the Vital parts Annoy.
His Beams do to the Spring, Refreshment give
Causing each Languish'd Vegetable to live
The Seasons he divides, and Makes the year
In Transiting of the Celestial Sphere.

5 Venus. ♀.

Illuminate Venus, Glory shining Star!
Fair *Phosphorus*, *Hesper*, and *Lucifer*!
Mother *Cupid*, Beauties character,
Lady of the Celestial Charloter!
Assumes the Role o'er courtly females Carriages,
Including both their Love suits and their Marriages,
Nuptial Delights, the youthful fond desire
Of those that scorch in the *Italian* fire.
She signifies such as in Silks do Trade
Those by whom curious Ornaments are made
Of Linnen, Costly Silks, and (what ensues)
Such as do sweet perfumes and Odours use,
Her precious Herbs, (Bearing a Fragrant flow'r)
Do fortifie the Generative power.

Culpepper 1699.

6 Mercury. ♄.

Tender Ey'd *Hermes* (that creeps near the Sun)
(And from his presence dare not far to Run)
Denoteth the Ingenious and the wise
That do in Arts and Science Exercise:
Such as are Pregnant, Ready to Invention,
And of an Easie, facile Apprehension.
He makes Good *Poets* and *Mathematicians*
Accomptants, *Lawyers*, *Merchants* and *Musicians*.
His spicy Herbs do fortifie the Brain
Against Distempers that Annoy the same.

7 Luna. ♀.

Luna the Goddess of the silent Night,
Phæbe, *Diana*, various Flux of Light,
Denotes the chief of Females that Possess
Command and Rule o're Household Business:
And (in a Larger sense) she doth Relate
The Common People of the Publick State.
She gives Possession such as are contain'd
In Water Works, whether by Sea, or Land.
Her Herbs (with cooling Juice) serve to expell,
And Tame Distempers, that with Heat Rebel.
They Lenitice and cool Inflamed parts,
And Mitigate, *Astringent Cholrick* smarts:

Long hath experience (from Antiquity)
Observ'd the Heavenly Bodies how they move,
Their power below, their Magnitude on high,
And which Incline to Hate, and which to Love.
When they on Kingdoms smile, and when they Frown,
When Health they shew, or Sickness they portend,
What Great men Rise to Honour or fall down;
Or when to Peace or War the Nations Bend.
Then let no *Zoilus* such a truth molest,
That's own'd by verue of *Probatum est*.

upon

Upon the Four Quarters of the Year.

I Of the Spring.

WELCOME sweet Titan, Bridgroom of the Year!
The Glory and the comfort of our Sphere!
Thy Splendant Raies revive all Earthly things!
The Little-Birds rejoycing clap their wings!
The Merry Lark sores up into the Air
With Sugr'd Notes! congratulating there
The Glory of the Spring! the Suns Bright eye,
That Gilds the Firmament, the Azure-sky.
The Wanton Lambs that in the valleys feed,
Skip to and fro, whilst Pan plays on his Reed!
Each little Animal and Vegetive
Lift up their Heads! Now again Revive.

2 Upon the Summer Quarter.

NOW is Majestick Sol in's Highest clime.
In's Greatest Attitudes the Tropick-Sign;
Belching down Beams of Heat, and Melting Raies,
To make the Season Teem with Summer-Days.
And now the Earth is wrapt in Lovely Green
Bedeck't with Flora's Wealth, and Fragrant Queen;
Who on the Hills and Valleys sits Delicious,
As long as Sol is kind and proves propitious:
But what is she that sits in such perfume,
When all things that are Mortal must consume.

By Night we Walk the Heavens to survey.
And see how Madam Cynthia sweeps the way
With her fair Glory Silver-shining Ray's,
And all the Little-Stars about her Blaze
Fixt in the Constellations of the Sphere,
Both in the South and Northern Hemisphere.

Calpepper 1699.

3 Of the Autumnal Quarter.

NOW *Phæbus* flacks his Summer Burning Rays,
And *Flora's* Beauty withers and Decays.
Trees Lose their Leaves, the Fields the Summer Pride
And Sickneses appear in Men beside.
The *Husbandmen* that now your Crops have Reap'd,
And In your Barns the Fruits of *Ceres* heap'd,
Remember from whose hand your Goods proceed,
And think upon the Poor that stand in need.
Free hearts have joy, while Niggard souls that Grutch
Do still repine, possess they ne're so much.

4 Of the Winter-Quarter.

P*hæbus* farewell! thy Absence we bemoan!
Earth's Barren now, But big with sorrow Grown,
Behold how all things (in thy Declination)
Lye With'rd and Dejected in their station.
The cold mouth'd *Boreas*, with his Blustering Breath,
Has banish'd *Florea*, and hath Robb'd the *Earth*
Of all her Pride: Each Vegetive is Lost,
Through *Icy Dews*, and *Snows* and *Nipping Frost*.
The *Earth* looks Old and Fruitless, all is gone,
Which once was pleasant for to look upon.
Return sweet *Phæbus*, from thy Southern Race,
And Rebehold us, with thy Lovely Face.

C O N C L U S I O N.

THis present year now weareth out ;
So soon Twelve Months are gone about!
You've seen the year increase and walt,
Spring, *Summer*, *Autumn*, which are past.
So changeth Man, upon this Stage,
That's now in Youth ; anon in Age :
Now Young, then Strong ; In Grief and Mirth
Now here, anon involv'd in Earth.
But happy's he (tho' in this case)
That Grows in years, and Thrives in Grace.
